Company Profile

Protocol Cashmere is a Bangladesh-based apparel sourcing, buying house, and manufacturing support company with operations across Bangladesh and Germany. We combine Bangladesh's manufacturing excellence with European business standards to deliver efficient, transparent, value-driven sourcing for global fashion brands, retailers, importers, and wholesalers.

Through our extensive network of internationally compliant manufacturing partners, we provide reliable sourcing, competitive pricing, superior quality assurance, compliance management, and on-time delivery services. Our experienced team supports clients throughout the entire product lifecycle, including product development, merchandising, production planning, quality control, and supply chain coordination. By combining Bangladesh's manufacturing excellence with European business standards, we ensure efficiency, transparency, and value-driven solutions for customers worldwide.

Official Registration. Company Registration No: CH-16479/2025 · Trade License: TRAD/CHTG/018313/2025 · VAT / TAX No: 818527859481 · Compliance Framework: PCG. We serve as a trusted bridge between global buyers and world-class manufacturing facilities, helping brands achieve success in today's competitive international apparel market.

COVERAGE

LEADERSHIP

Managing Director / CEO: Md Kamrul Hasan — responsible for global business development, international buyer communication, sourcing strategy and overall business operations.

Chairman: Ayesha Akter Anika — provides strategic leadership, corporate governance and organizational development support.

Director & Strategic Advisor: Engr. Md. Nurul Ghani Osmany — supports operational planning, factory development, technical coordination and long-term business growth.

SERVICE COVERAGE

Product development — from tech-pack to sample

Sourcing & merchandising — factory selection, fabric & trim sourcing

Production planning — T&A, capacity booking, critical path

Quality control — 4-point fabric, IPQC, PFI, FRI to AQL 2.5

Compliance management — EU REACH, BSCI, WRAP, OEKO-TEX, Sedex

Supply chain & shipment — documentation, container loading, EU customs

How the FOB Price is Built

Every FOB price in this offer is built from the same six-component stack: fabric, CMT, trims, wash, overhead and margin. Nothing is hidden and nothing is rounded. Below is the methodology applied uniformly to all nineteen styles.

Fabric is the largest cost driver, ranging from 40% of FOB on complex outerwear (where CMT dominates) up to 65% on simple knit tops. We calculate fabric consumption in kilograms per piece using the actual pattern marker on a **60-inch (152 cm) cutting width**, and we apply the standard GSM for each product class — 60 GSM for nylon taffeta, 130 GSM for cotton poplin, 160–200 GSM for single jersey knits, 260–280 GSM for fleece and softshell, 280 GSM for 12oz denim. Fabric price is quoted per kg and includes knitting/weaving, dyeing and finishing but excludes print or yarn-dyed surcharges which are added explicitly where applicable.

CMT (Cut-Make-Trim) covers cutting, sewing, thread, finishing and packing labour, calibrated against Bangladesh standard minutes and current minimum wage. Woven outerwear with multiple zippers and pockets commands higher CMT (1.60–3.20) than simple knit tops (0.45–0.75). **Trims** include labels, hangtags, polybags, elastic, zippers (YKK standard), buttons, rivets, drawcords and any metal hardware. **Wash** covers softener wash, denim stone/enzyme wash (\$1.20 for PC-W06 denim), or brushed-fleece finishing.

Overhead is loaded at **6%** of the subtotal and covers compliance audits (BSCI, WRAP, OEKO-TEX, Sedex), commercial expenses, factory utilities and quality infrastructure. **Profit margin** is loaded at **12%** applied to (subtotal + overhead). The resulting **FOB Chittagong price** is the price the buyer pays per piece, free-on-board at Chittagong port, exclusive of ocean freight, insurance and import duty. The same stack is reproduced line-by-line on each product's detail page so the buyer can audit, negotiate or substitute any component.

FOB BUILD-UP STACK — STANDARD METHODOLOGY

01	Fabric Consumption (kg) × Yarn-and-dye price (\$/kg), 60" cutting width	40–65%
02	CMT — Cut, Make, Trim Cutting + sewing + finishing + packing labour	18–30%
03	Trims & Accessories YKK zips, buttons, drawcords, labels, polybags, hardware	10–18%
04	Wash & Finish Softener, denim wash, fleece brushing	1–10%
05	Overhead (6%) Compliance, commercial, utilities, quality infrastructure	6%
06	Profit Margin (12%) Applied on subtotal + overhead	12%

Quality Assurance System

Our quality management system is designed to prevent defects rather than detect them after production. We maintain consistent product quality, reduce rework, ensure compliance with buyer specifications, and meet European Union quality and performance expectations.

Quality at Protocal Cashmer follows a multi-stage inspection framework aligned with internationally recognized AQL standards and EU market expectations. Every order passes through **4-Point Fabric Inspection**, **In-Process Quality Control (IPQC)**, **Table Inspection**, **Pre-Final Inspection (PFI)** at 80–90% completion, and **Final Random Inspection (FRI)** before shipment. Third-party inspection by SGS, Bureau Veritas, or buyer-nominated agencies is welcomed at any stage.

QUALITY CONTROL STAGES

01 · Piece Goods Inspection (4-Point System)

Minimum 10% of fabric rolls inspected per shipment. Color and shade verification across dye lots. Major defect identification: slubs, holes, shade variation, oil stains, dye spots, broken patterns, grain line distortion.

03 · In-Process Quality Control (IPQC)

Real-time production tracking, inline quality inspections, process control at critical operations, defect trend analysis and corrective actions, daily quality performance reviews.

05 · Pre-Final Inspection (PFI)

Conducted at 80–90% completion and packed. Verifies workmanship, measurements, fabric quality, color shade, print/wash quality, labeling, carton marking, assortment and packing ratio.

02 · Cutting Department QC

Fabric relaxation control, spreading control with shade segregation and ply tension monitoring. Cutting quality verification: pattern accuracy, notch positioning, bundle integrity, shade matching between plies.

04 · Table Inspection

Flat-table inspection under standard lighting. Checks: fabric defects, sewing quality, measurement verification, trims, printing/embroidery quality, label and packaging compliance, needle damage, color consistency.

06 · Final Random Inspection (FRI)

AQL 2.5 major / AQL 4.0 minor / Critical 0.0. Random sampling per ISO 2859. Final go/no-go decision before shipment release. Third-party inspectors welcome.

All nineteen styles in this offer are produced under the PCG compliance framework through internationally compliant manufacturing partners. We work to BSCI, WRAP, OEKO-TEX Standard 100 and Sedex SMETA audit standards, with full REACH documentation for EU shipments.

Protocal Cashmer operates as a buying house and manufacturing support company, sourcing through a network of internationally compliant manufacturing partners in Bangladesh. All partner factories are vetted for social compliance, technical capability, and quality infrastructure. For EU buyers, we provide full REACH documentation including phthalate, azo-dye and heavy-metal test reports on request. Our compliance framework follows European Union occupational health & safety principles, international best practices, and continuous improvement approaches.

SOCIAL AUDIT · ANNUAL

BSCI (amfori)

Business Social Compliance Initiative. Full social compliance audit through partner factories. Grade B target.

FACILITY · BI-ANNUAL

WRAP

Worldwide Responsible Accredited Production. Partner facilities certified for legal, ethical and safe production.

PRODUCT · ANNUAL

OEKO-TEX 100

Standard 100 certification on cotton single jersey and woven fabrics. Confirms no harmful substances.

PLATFORM · CONTINUOUS

Sedex / SMETA

Registered member. SMETA 4-pillar audit available annually on buyer request across partner factories.

EU COMPLIANCE

REACH

Full REACH documentation including phthalate, azo-dye and heavy-metal test reports on request for all EU shipments.

QUALITY · SYSTEM

AQL 2.5 / 4.0

Acceptance Quality Level: Critical 0.0, Major 2.5, Minor 4.0. Aligned with ISO 2859 and EU market expectations.

Sustainability options available on request: recycled polyester (GRS-certified) for the softshell and puffer jackets (PC-W02, PC-W03, PC-W04, PC-W05), organic cotton (GOTS-certified) for the cargo shorts, denim capri and basic knit tops (PC-W01, PC-W06, PC-K01, PC-K08), and bio-degradable polybags across the full range. ZDHC MRSL Level 1 conformant dyeing and printing mills can be nominated for any style.
